

## Childcare facilities for staff and faculty

The Women University of Azad Jammu and Kashmir (WUAJ&K) Bagh is providing comprehensive childcare facilities that cater to the needs of our valued faculty, staff, and students. Academic pursuits and professional responsibilities can be challenging, especially with young children. That's why we've established a state-of-the-art child care center to support our university community since 2019. **The notification of the establishment of a Child Care Facility is given in the Annex. I** (which is in Urdu because, at that time, the university's official language was Urdu) and **recent pictures of day care facility are provided in Annex. II.**

We aim to foster community within our child care center, encouraging strong bonds among families, staff, and the little ones. Our commitment to inclusivity means we welcome children of all backgrounds, ensuring a diverse and welcoming environment. Providing childcare options is a convenience and an integral part of our commitment to creating an equitable and inclusive campus to promote Gender Equality according to SDG 5.
