

Collaboration for SDG Best Practice

Collaboration for Sustainable Development Goals (SDGs) in universities involves working together to address the global challenges identified by the United Nations. Best practices in this collaboration ensure that universities contribute effectively to the SDGs and maximize their efforts' impact. The Women University of Azad Jammu and Kashmir (WUAJ&K) is partnering with various organizations to enhance SDG outcomes. The university has collaborated closely with the **International Union for Conservation of Nature (IUCN)**, Dr. Mubashar Gardazi, Assistant Professor in the Department of Botany, as the focal person to foster cooperation. Dr. Mubashar Gardazi has also been nominated as the focal person for the university consortium on climate change, sustainability, and conservation. **(Evidence at Annex. I)**

The Memorandum of Understanding (MoU) between the WUAJ&K and the **Environmental Change Makers (ECM)**, an NGO working on climate change, was formalized on 01.03.2023. ECM promotes environmental sustainability through tree planting, community education, and policy advocacy. Both parties acknowledge the critical need to address climate change and work towards sustainable development, aligning with SDG 13: Climate Action. This MoU represents a commitment to collaborating on climate action, environmental awareness, and sustainability initiatives. **(Evidence at Annex. II)**
