

Sustainable Literacy

To ensure sustainable literacy, the Women University of Azad Jammu and Kashmir Bagh practices both ongoing and summative assessments continuously. **Ongoing (formative) assessment** helps the instructor to check the level of understanding of students about sustainability concepts, and accordingly, he/ she can focus on specific areas that need more support and clarification. This includes quizzes and class tests comprising open and close-ended questions. Secondly, **summative assessments** are practiced to measure the overall understanding and level of retention of the key concepts of sustainability. This includes comprehensive exams of the subjects/ courses, which include a wide range of syllabi on sustainability. The instructors are also directed to assign presentations, projects, and several practical assignments to evaluate their knowledge, skills, and practical applications in different local contexts.
